

—Magic Squares

You will need one set of number cards. You are going to make a magic square.

- Remove the zero and put it to one side.
- Place the 5 in the centre of the grid of grey boxes.
- Make a magic cross with the odd numbers.
- Put the even numbers in the corner boxes so that each row, column and diagonal has the same total.

You have made a magic square.

- Record your magic square.
- Make a different magic square using the numbers from 0 to 8.
