

Multiplication Tables Jigsaw Puzzle

This is the cutting pattern to give you an excellent puzzle with 20 pieces, each of 5 squares.

When you print your display grid the pages are numbered from 1 to 6, first along the top row and then along the bottom row.

The colours are there to allow you to see the shapes clearly. The puzzle itself works well if printed onto pale blue card.

The puzzle works best if you laminate the pages first and then cut the pieces out as shown.
